

# KJS Summer Enrichment Challenge

The events of the past 18 months have not only been unique but challenging for many. You have shown remarkable resilience despite the fact that you have potentially missed out on a few important experiences both in and outside of school. We are therefore encouraging you to be as positive and proactive as possible during the summer holidays.

Rather than spending the summer inside (or just doing what you always do) try to engage with our 'enrichment challenge'! Enrich your summer, step out of your comfort zone and do something you haven't done before. Try to **'expand your horizons'** - be imaginative and creative with your time. Attempt to fill your summer with **enriching experiences** and record your top four below - bring this in with you in September for discussion with your tutor and for some +6's!

## MENU OF IDEAS...
