

# Year 13 Psychology Revision Timetable

Name:

We recommend that you follow the revision schedule set out below for each week. **You SHOULD:**

- Create your own revision notes, so choose the technique that works for you, **or** ask your teacher or your friends for suggestions of how to do this. Put your class notes, homeworks, and text book information into a revisable format.
- Get someone to test you.
- Do assessment practice - download exam papers from the AQA website. Complete them then mark them.

**If you are already revising and have your own plan, stick to yours.**

Date	Topic
w/b 19 <sup>th</sup> Feb	Approaches
w/b 26 <sup>th</sup> Feb	Research Methods 1
w/b 4 <sup>th</sup> March	Social Influence
w/b 11 <sup>th</sup> March	Research Methods 2
w/b 18 <sup>th</sup> March	Memory
w/b 25 <sup>th</sup> March	Research Methods 3
w/b 1 <sup>st</sup> April	Attachment
w/b 8 <sup>th</sup> April	Research Methods 4
w/b 15 <sup>th</sup> April	Psychopathology
w/b 22 <sup>nd</sup> April	Research Methods 5
w/b 29 <sup>th</sup> April	Biopsychology
w/b 6 <sup>th</sup> May	Issues & Debates
w/b 13 <sup>th</sup> May	Relationships
w/b 20 <sup>th</sup> May	Schizophrenia
w/b 27 <sup>th</sup> May	Forensic Psychology

## Exam Dates

Paper 1: Friday 17<sup>th</sup> May am

Paper 2: Wednesday 22<sup>nd</sup> May am

Paper 3: Monday 3<sup>rd</sup> June pm

When	What	Revision Notes	Assessment Practice	Seneca
<b>Week 1</b> w/b 19/02/24	<p><b>APPROACHES</b></p> <p><a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/2dd70a14-9aef-4e63-8eb6-56a441c51d6d">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/2dd70a14-9aef-4e63-8eb6-56a441c51d6d</a></p> <ol style="list-style-type: none"> <li><b>Origins of Psychology:</b> Wundt, introspection and the emergence of Psychology as a science.</li> </ol> <p>The basic assumptions of the following approaches:</p> <ol style="list-style-type: none"> <li><b>Learning approaches:</b> i) the behaviourist approach, including classical conditioning and Pavlov's research, operant conditioning, types of reinforcement and Skinner's research; ii) social learning theory including imitation, identification, modelling, vicarious reinforcement, the role of mediational processes and Bandura's research.</li> <li><b>The cognitive approach:</b> the study of internal mental processes, the role of schema, the use of theoretical and computer models to explain and make inferences about mental processes. The emergence of cognitive neuroscience.</li> <li><b>The biological approach:</b> the influence of genes, biological structures and neurochemistry on behaviour. Genotype and phenotype, genetic basis of behaviour, evolution and behaviour.</li> <li><b>The psychodynamic approach:</b> the role of the unconscious, the structure of personality, that is Id, Ego and Superego, defence mechanisms including repression, denial and displacement, psychosexual stages.</li> <li><b>Humanistic Psychology:</b> free will, self-actualisation and Maslow's hierarchy of needs, focus on the self, congruence, the role of conditions of worth. The influence on counselling Psychology.</li> <li><b>Comparison of approaches.</b></li> </ol>			
<b>Week 2</b> w/b 26/02/24	<p><b>RESEARCH METHODS 1</b></p> <p><a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/46abb396-9975-46e7-8b24-57ee7ed4e511">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/46abb396-9975-46e7-8b24-57ee7ed4e511</a></p> <ol style="list-style-type: none"> <li><b>Aims:</b> stating aims, the difference between aims and hypotheses.</li> <li><b>Hypotheses:</b> directional and non-directional.</li> <li><b>Sampling:</b> the difference between population and sample; sampling techniques including: random, systematic, stratified, opportunity and volunteer; implications of sampling techniques, including bias and generalisation.</li> </ol>			

	<ol style="list-style-type: none"> <li><b>Pilot studies</b> and the aims of piloting.</li> <li><b>Experimental designs:</b> repeated measures, independent groups, matched pairs.</li> <li><b>Observational design:</b> behavioural categories; event sampling; time sampling.</li> <li><b>Questionnaire construction</b>, including use of open and closed questions; design of interviews.</li> </ol>			
<b>Week 3</b> w/b 04/03/24	<b>SOCIAL INFLUENCE</b> <a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/aeb1b58a-1280-42dd-b4bb-3b53a208d537">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/aeb1b58a-1280-42dd-b4bb-3b53a208d537</a> <ol style="list-style-type: none"> <li><b>Types of conformity:</b> internalisation, identification and compliance. Explanations for conformity: informational social influence and normative social influence, and variables affecting conformity including group size, unanimity and task difficulty as investigated by Asch.</li> <li><b>Conformity to social roles</b> as investigated by Zimbardo.</li> <li><b>Explanations for obedience:</b> agentic state and legitimacy of authority, and situational variables affecting obedience including proximity and location, as investigated by Milgram, and uniform. Dispositional explanation for obedience: the Authoritarian Personality.</li> <li><b>Explanations of resistance to social influence</b>, including social support and locus of control.</li> <li><b>Minority influence</b> including reference to consistency, commitment and flexibility.</li> <li>The role of social influence processes in <b>social change</b>.</li> </ol>			
<b>Week 4</b> w/b 11/03/24	<b>RESEARCH METHODS 2</b> <a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/e665a789-620b-4d13-a8d3-e61482f3d68f">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/e665a789-620b-4d13-a8d3-e61482f3d68f</a> <ol style="list-style-type: none"> <li><b>Variables:</b> manipulation and control of variables, including independent, dependent, extraneous, confounding; operationalisation of variables.</li> <li><b>Control:</b> random allocation and counterbalancing, randomisation and standardisation.</li> <li><b>Demand characteristics and investigator effects.</b></li> <li><b>Ethics</b>, including the role of the British Psychological Society's code of ethics; ethical issues in the design and conduct of psychological studies; dealing with ethical issues in research.</li> <li><b>The role of peer review</b> in the scientific process.</li> <li><b>The implications of psychological research for</b></li> </ol>			

	<p><b>the economy.</b></p> <p>7. <b>Reliability</b> across all methods of investigation. Ways of assessing reliability: test-retest and inter-observer; improving reliability.</p>			
<p><b>Week 5</b> w/b 18/03/24</p>	<p><b>MEMORY</b></p> <p><a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/f7502135-42b3-4e41-9267-95fb3b826a28">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/f7502135-42b3-4e41-9267-95fb3b826a28</a></p> <ol style="list-style-type: none"> <li>1. <b>The multi-store model of memory:</b> sensory register, short-term memory and long-term memory. Features of each store: coding, capacity and duration.</li> <li>2. <b>Types of long-term memory:</b> episodic, semantic, procedural.</li> <li>3. <b>The working memory model:</b> central executive, phonological loop, visuo-spatial sketchpad and episodic buffer. Features of the model: coding and capacity.</li> <li>4. <b>Explanations for forgetting:</b> proactive and retroactive interference and retrieval failure due to absence of cues.</li> <li>5. <b>Factors affecting the accuracy of eyewitness testimony:</b> misleading information, including leading questions and post-event discussion; anxiety.</li> <li>6. Improving the accuracy of eyewitness testimony, including the use of <b>the cognitive interview</b></li> </ol>			
<p><b>Week 6</b> w/b 25/03/24 (Easter)</p>	<p><b>RESEARCH METHODS 3</b></p> <p><a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/048212f3-73f0-4f28-9a5a-5e1473fbdbf7">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/048212f3-73f0-4f28-9a5a-5e1473fbdbf7</a></p> <ol style="list-style-type: none"> <li>1. <b>Types of validity</b> across all methods of investigation: face validity, concurrent validity, ecological validity and temporal validity. Assessment of validity. Improving validity.</li> <li>2. <b>Features of science:</b> objectivity and the empirical method; replicability and falsifiability; theory construction and hypothesis testing; paradigms and paradigm shifts.</li> <li>3. <b>Reporting psychological investigations.</b> Sections of a scientific report: abstract, introduction, method, results, discussion and referencing.</li> <li>4. <b>Quantitative and qualitative data;</b> the distinction between qualitative and quantitative data collection techniques.</li> <li>5. <b>Primary and secondary data,</b> including meta-analysis.</li> <li>6. <b>Descriptive statistics:</b> measures of central tendency – mean, median, mode; calculation of mean, median and mode; measures of</li> </ol>			

	<p>dispersion; range and standard deviation; calculation of range; calculation of percentages; positive, negative and zero correlations.</p> <p>7. <b>Presentation and display of quantitative data:</b> graphs, tables, scattergrams, bar charts, histograms.</p>			
<p><b>Week 7</b> w/b 01/04/24 (Easter)</p>	<p><b>ATTACHMENT</b>  <a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/196c3dd9-c479-45e5-b884-470016459588">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/196c3dd9-c479-45e5-b884-470016459588</a></p> <ol style="list-style-type: none"> <li>1. <b>Caregiver-infant interactions in humans:</b> reciprocity and interactional synchrony. Stages of attachment identified by Schaffer. Multiple attachments and the role of the father.</li> <li>2. <b>Animal studies of attachment:</b> Lorenz and Harlow.</li> <li>3. <b>Explanations of attachment:</b> learning theory and Bowlby's monotropic theory. The concepts of a critical period and an internal working model.</li> <li>4. <b>Ainsworth's 'Strange Situation'.</b> Types of attachment: secure, insecure-avoidant and insecure-resistant. Cultural variations in attachment, including van Ijzendoorn.</li> <li>5. <b>Bowlby's theory of maternal deprivation.</b> Romanian orphan studies: effects of institutionalisation.</li> <li>6. <b>The influence of early attachment on childhood and adult relationships,</b> including the role of an internal working model.</li> </ol>			
<p><b>Week 8</b> w/b 08/04/24</p>	<p><b>RESEARCH METHODS 4</b>  <a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/6b7d866c-df3d-4cb4-8b3e-3180df15dcc4">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/6b7d866c-df3d-4cb4-8b3e-3180df15dcc4</a></p> <ol style="list-style-type: none"> <li>1. <b>Distributions:</b> normal and skewed distributions; characteristics of normal and skewed distributions.</li> <li>2. <b>Analysis and interpretation of correlation,</b> including correlation coefficients.</li> <li>3. <b>Levels of measurement:</b> nominal, ordinal and interval.</li> <li>4. <b>Content analysis and coding.</b> Thematic analysis.</li> <li>5. <b>Introduction to statistical testing;</b> the sign test. When to use the sign test; calculation of the sign test.</li> <li>6. <b>Probability and significance:</b> use of statistical tables and critical values in interpretation of significance; Type I and Type II errors.</li> <li>7. <b>Factors affecting the choice of statistical test,</b> including level of measurement and experimental design. When to use the following</li> </ol>			

	tests: Spearman's rho, Pearson's r, Wilcoxon, Mann-Whitney, related t-test, unrelated t-test and Chi-Squared test.			
<b>Week 9</b> w/b 15/04/24	<b>PSYCHOPATHOLOGY</b> <a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/4cc09698-2c7b-4d92-978a-1e8b2fb02479">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/4cc09698-2c7b-4d92-978a-1e8b2fb02479</a>  1. <b>Definitions of abnormality</b> , including deviation from social norms, failure to function adequately, statistical infrequency and deviation from ideal mental health. 2. <b>The behavioural, emotional and cognitive characteristics</b> of phobias, depression and obsessive-compulsive disorder (OCD). 3. <b>The behavioural approach to explaining and treating phobias</b> : the two-process model, including classical and operant conditioning; systematic desensitisation, including relaxation and use of hierarchy; flooding. 4. <b>The cognitive approach to explaining and treating depression</b> : Beck's negative triad and Ellis's ABC model; cognitive behaviour therapy (CBT), including challenging irrational thoughts. 5. <b>The biological approach to explaining and treating OCD</b> : genetic and neural explanations; drug therapy.			
<b>Week 10</b> w/b 22/04/24	<b>RESEARCH METHODS 5</b> <ul style="list-style-type: none"> <li>Practice 12 mark questions</li> </ul>			
<b>Week 11</b> w/b 29/04/24	<b>BIOPSYCHOLOGY</b> <a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/214faf98-7c51-440e-bd9d-8432f229a84c">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/214faf98-7c51-440e-bd9d-8432f229a84c</a>  1. <b>The divisions of the nervous system</b> : central and peripheral (somatic and autonomic). 2. <b>The structure and function of sensory, relay and motor neurons</b> . The process of <b>synaptic transmission</b> , including reference to neurotransmitters, excitation and inhibition. 3. <b>The function of the endocrine system</b> : glands and hormones. 4. <b>The fight or flight response</b> including the role of adrenaline. 5. <b>Localisation of function in the brain and hemispheric lateralisation</b> : motor, somatosensory, visual, auditory and language centres; Broca's and Wernicke's areas, split brain			

	<p>research.</p> <p>Plasticity and functional recovery of the brain after trauma.</p> <p>6. <b>Ways of studying the brain:</b> scanning techniques, including functional magnetic resonance imaging (fMRI); electroencephalogram (EEGs) and event-related potentials (ERPs); postmortem examinations.</p> <p>7. <b>Biological rhythms:</b> circadian, infradian and ultradian and the difference between these rhythms. The effect of endogenous pacemakers and exogenous zeitgebers on the sleep/wake cycle.</p>			
<p><b>Week 12</b> w/b 06/05/24</p>	<p><b>ISSUES &amp; DEBATES</b></p> <p><a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/733f0f40-83d7-43e0-acf1-c3bfb3555fc0">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/733f0f40-83d7-43e0-acf1-c3bfb3555fc0</a></p> <p>1. <b>Gender and culture in Psychology</b> – universality and bias. Gender bias including androcentrism and alpha and beta bias; cultural bias, including ethnocentrism and cultural relativism.</p> <p>2. <b>Free will and determinism:</b> hard determinism and soft determinism; biological, environmental and psychic determinism. The scientific emphasis on causal explanations.</p> <p>3. <b>The nature-nurture debate:</b> the relative importance of heredity and environment in determining behaviour; the interactionist approach.</p> <p>4. <b>Holism and reductionism:</b> levels of explanation in Psychology. Biological reductionism and environmental (stimulus-response) reductionism.</p> <p>5. <b>Idiographic and nomothetic</b> approaches to psychological investigation.</p> <p>6. <b>Ethical implications of research studies and theory</b>, including reference to social sensitivity.</p>			
<p><b>Week 13</b> w/b 13/05/24</p>	<p><b>RELATIONSHIPS</b></p> <p><a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/5e38efd6-c7b3-495f-b5f5-7852ce6e4070">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/5e38efd6-c7b3-495f-b5f5-7852ce6e4070</a></p> <p>1. <b>The evolutionary explanations for partner preferences</b>, including the relationship between sexual selection and human reproductive behaviour.</p> <p>2. <b>Factors affecting attraction in romantic relationships:</b> self-disclosure; physical attractiveness, including the matching hypothesis; filter theory, including social demography, similarity in attitudes and</p>			

	<p>complementarity.</p> <p>3. <b>Theories of romantic relationships:</b> social exchange theory, equity theory and Rusbult's investment model of commitment, satisfaction, comparison with alternatives and investment.</p> <p>4. <b>Duck's phase model of relationship breakdown:</b> intra-psychic, dyadic, social and grave dressing phases.</p> <p><b>5. PAPER 1 17<sup>th</sup> May (am)</b></p> <p>6. <b>Virtual relationships in social media:</b> self-disclosure in virtual relationships; effects of absence of gating on the nature of virtual relationships.</p> <p>7. <b>Parasocial relationships:</b> levels of parasocial relationships, the absorption addiction model and the attachment theory explanation.</p>			
<p><b>Week 14</b> w/b 20/05/24</p>	<p><b>SCHIZOPHRENIA</b></p> <p><a href="https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/faa69b11-3876-4688-bf88-4736ed394e70">https://app.senecalearning.com/dashboard/class/ejsemx7akc/assignments/assignment/faa69b11-3876-4688-bf88-4736ed394e70</a></p> <p>1. <b>Classification of schizophrenia.</b> Positive symptoms of schizophrenia, including hallucinations and delusions. Negative symptoms of schizophrenia, including speech poverty and avolition.</p> <p><b>Reliability and validity in diagnosis and classification of schizophrenia,</b> including reference to co-morbidity, culture and gender bias and symptom overlap.</p> <p>2. <b>Biological explanations for schizophrenia:</b> genetics and neural correlates, including the dopamine hypothesis.</p> <p><b>3. PAPER 2 22<sup>nd</sup> May (am)</b></p> <p>4. <b>Drug therapy:</b> typical and atypical antipsychotics</p> <p>5. <b>Psychological explanations for schizophrenia:</b> family dysfunction and cognitive explanations, including dysfunctional thought processing.</p> <p>6. <b>Cognitive behaviour therapy and family therapy</b> as used in the treatment of schizophrenia.</p> <p>7. <b>Token economies</b> as used in the management of schizophrenia.</p> <p><b>The importance of an interactionist approach</b> in explaining and treating schizophrenia; the diathesis-stress model.</p>			
<b>Week 15</b>	<b>FORENSIC PSYCHOLOGY</b>			

w/b 27/05/24	<a href="https://app.senecalearning.com/dashboard/class/ei-semx7akc/assignments/assignment/d0fce72a-57d3-4fee-838c-ef98d046a65e">https://app.senecalearning.com/dashboard/class/ei-semx7akc/assignments/assignment/d0fce72a-57d3-4fee-838c-ef98d046a65e</a>			
	<ol style="list-style-type: none"> <li>1. <b>Offender profiling:</b> the top-down approach, including organised and disorganised types of offender; the bottom-up approach, including investigative Psychology; geographical profiling.</li> <li>2. <b>Biological explanations of offending behaviour:</b> an historical approach (atavistic form); genetics and neural explanations.</li> <li>3. <b>Psychological explanations of offending behaviour:</b> Eysenck's theory of the criminal personality; cognitive explanations; level of moral reasoning and cognitive distortions, including hostile attribution bias and minimalisation; differential association theory; psychodynamic explanations.</li> <li>4. <b>Dealing with offending behaviour:</b> the aims of custodial sentencing and the psychological effects of custodial sentencing. Recidivism. Behaviour modification in custody. Anger management and restorative justice programmes.</li> </ol>			
Week 16 w/b 03/06/24	<b>PAPER 3 Monday 3<sup>rd</sup> June (pm)</b>			

**Good Luck!**
