Year 10 History Revision Timetable - Year 10 Mock Exams w/c

Pupil Name:

You must undertake ACTIVE revision for it to be effective. You will only retain 10-15% of what you read, copy or hear. It is the process of synthesising, chunking down, processing etc which helps information stick in your brain. Recommended Activities:

- -Mindmaps
- -Timelines
- -Flashcards- key people, key events and case studies
- -Quizzes e.g. Quizizz or Seneca Learning
- -Past Paper Exam Questions you have been given these.

THE EXAM (Exam Board- Edexcel)

- Medicine Through Time- 1 hour 15 minutes
- Medieval Medicine, Renaissance Medicine, Industrial Medicine, Modern Medicine and WWI Western Front: How did Understanding Causes, Approaches to Care and Treatment and Prevention Change 1250-Present and WHY- Use the WASIIC Factors

U\$EFUL RE\$OURCE\$

You have your revision guide for Medicine- this covers all the content but not in depth! These are good for factual knowledge for Grades 1-6 for the highest grades you need more depth.

You also have your exercise books which have detailed notes and explanations in them

Its Learning- All lessons and all revision resources are saved in History Courses> Resources> Revision> GCSE> Medicine

Useful revision websites, videos & apps

www.bitesize.co.uk- search for EDEXCEL medicine (other exam boards are different)

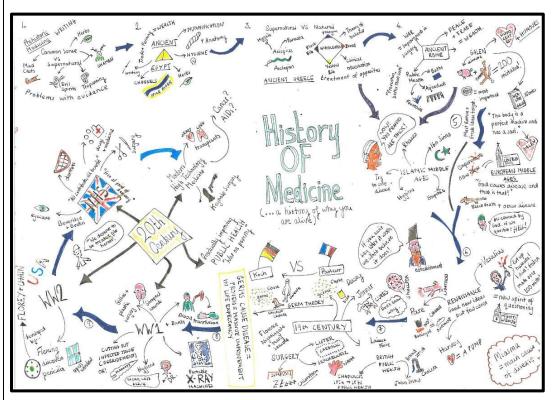

www.senecalearning.co.uk- the link is on Its Learning- on the calendar

www.youtube.com search for medicine through time- all these videos are also saved on Its Learning for you.

The revision guides you purchased-also include a free app-details in the guide

How to Create a Mindmap

Mindmaps are by far the best way to revise history. With a mindmap—it is possible to revise large amounts of subject content (weeks worth of learning) in just a few hours.

Research shows that pictures, colour and numbers help our memory therefore adding little icons or images beside bullet points will help students- see example on the medicine learning journey which is all dual coded with images.

If students are revising causes of change in public health during the industrial era for example, they can number each cause and draw a small image beside them this will help with their recall as they may recall there were 4 main causes, then recall the image of snow coming out of a cloud and remember

individuals like John Snow (not of Game of Thrones fame!) caused change with his cholera research.

See example above- this is an overview which is a great start but students would also need to explore each topic in depth also.

Week Commencing/ Topics to Cover	Suggested Activities	Complete?	Confident?
-	MI M		
Week 1:	Make a Mind map on Ideas on CAUSES of disease split		
Week Commencing 19 th Feb	into 4 sections- one per era: Medieval 1250-1500,		
2024	Renaissance 1500-1700, Industrial 1700-1900 and Modern		
	1900-Present		
-How did Understanding	Add images, notes and key words/ people related to		
the Causes of Disease	ideas about causes: Make sure you have included:		
Change over Time 1250-	-Hippocrates and four humours and Galen and Theory of		
Present?	Opposites, Vesalius-anatomy. Harvey and circulatory		
Case Studies to include: The	system, microscopes and animalcules, Sydenham,		
Black Death 1348-51, The	spontaneous generation and Nightingale/ Bastion, Snow		
Great Plague 1665, The	•		
_	and his theories/ experiments, Pasteur and Germ Theory,		
Cholera Epidemics 1832 and	Koch, Franklin, Crick and Watson, DNA, Hereditary		
1848-1850, The fight against	Illnesses and Lifestyle Factors and all their ideas as well as		
Lung Cancer (1950s-	other relevant WASIIC factors which helped progress/		
Present)	limited progress.		
Week 2:	Make a Mindmap split into 4 sections (one per time		
Week Commencing 26 th	period as above) this time on Approaches to		
Feb 2024	TREATMENT and CARE of the SICK.		
-How did Approaches to	Add images, notes and key words/ people related to		
Treatment of Illness Change			
_	ideas about treatments. Make sure you have included:		
over Time 1250-Present?	-Developments in Hospitals from monasteries, infirmaries,		
	pest houses and lazar houses to endowment hospitals,		
Include the case studies	pavilion and speciaist hospitals and world class NHS		
above but this time focus	teaching hospitals.		
on TREATMENTS used	-Developments in Surgery from barbers to Aspectic		
during each.	-Improvements in pharmacies from apothecaries to		
5	dispensaries		
	All key individuals related to TREATMENTS/ CURES		
	-Improvements in Physicians including TRAINING and		
	EDUCATION		
	-Availability of care- where could the poor access help?		
	-Herbal/ natural treatments over time		
	-Surgical procedures possible		
	-New chemical "cures"/ alchemy and tablets		
Week 3:	Week 3 wb 14/12/20		
Week Commencing 4th	Make a Mindmap split into 4 sections (oner per time		
	period as above) this time focused on: Ideas about		
March March 2023			
	PREVENTION of disease and PUBLIC HEALTH		
	Add images, notes and key words/ people related to		
	ideas about prevention. Make sure you have included:		
	-Regimen Sanitatis, Purging/ Bleeding and Laxatives,		
	Religious ideas, using the weather, moderation,		
	avoidance and quarantine, the Plague Orders, The first		
	public health acts 1848 and 1875 and what each did/ why		
	introduced, sewers, changing attitudes of government		
	from laissez-faire, the National Insurance Act and the		
	NHS, Healthy Lifestyle Campaigns, The Human Genome		
	Project and Preventative surgery and treatment,		
	Monitoring and Anti-Smoking legislation.		
Week 4	Make revision flashcards on all key individuals choose a		
Week Commencing 11 th	dream team of your top 11 medicine heroes- why are		
March 2024			
widi CII ZUZ4	their contributions more important?		
	Plan out essay answers for 2 16 mark Questions by		
	making tables of arguments FOR and AGAINST the		
	statements for 16 mark questions- use your mindmaps to		
	help you.		
Week 5	Complete Seneca revision for topics 1-4		1
	inclusive		
Week Commencing 18 th	Plan out answers to 3 12 markers from your list-make		
March 2024	brief notes on what each of your 3 paragraphs would		
	include.		
	Test yourself using your flashcards on key individuals- do		
	you know them all?		

Week Commencing/ Topics to Cover	Suggested Activities	Complete?	Confident?
Week 6 EASTER HOLIDAYS Week Commencing 25 th March	WW1 – Make a timeline of WWI of the key battles including weapons used and also of key improvements to various treatments e.g. Thomas Splint, Blood Transfusions, Mobile XRays, Harvey Cushing, Harold Gillies etc. For each of the parts of the Chain of Evacuation; write down 3 key facts about it.		
Week 7 EASTER HOLIDAYS Week Commencing 1st th April 2024- Mocks are this week	Complete describe 2 features questions below: -Describe 2 features of Dressing Stations -Describe 2 features of Blood Transfusion -Describe 2 features of Train Ambulances -Describe 2 features of treatment of shrapnel wounds -Describe 2 features of Plastic surgery Complete a practice 8 mark- how useful question		
Week 8 Week Commencing 8 th April 2024- Mocks are this week-	-Test yourself and complete any remaining Seneca questions -Use your flashcards for final checks of any facts you struggle with -Read the model answers you have been given to remind yourself of structure and how to answer the questions		

GOOD LUCK!!

Definitely don't try the Brain Salt! (A "Cure All from the Quacks of the early Industrial era- before they were outlawed!)
