

Self-Supported Study in **Physics**

EVERY LESSON

Before:

- Bring your folder, current notes/folder to every lesson.
- Complete homework and study actions below & bring that work/evidence with you.

During:

- Be ready to answer questions on the previous lesson's content & previous topics.
- Actively engage in the lesson: listen to the teacher; participate in activities with 100% effort; make notes; share your answers/ideas; respond to feedback.
- Be ready to make links from GCSE work to and between all A level Physics topics.

After:

- Organise your folder by putting all work from the lesson in the correct place.
- Write revision notes on the content of every lesson, using your notes and textbook.

WEEKLY

- **Homework:** details & deadlines on BromCom.
- **Read** the relevant pages of your textbook and add to your class notes.
- **Create a revision resource for a previous topic:** flashcards, quiz, mind map.
- **Learn the key terms** from your word list.
- **Redraft answers** using feedback.
- **Weekly revision tasks:** use the resources on SharePoint to complete the topic weekly revision task.

What to do if you do not understand something:

- Ask another student in your class.
- Ask the teacher in lesson.
- Email the teacher

EVERY 2 WEEKS

- **Retrieval practice** of previous content: write out what you remember without looking at your notes, check against your notes/textbook, then correct in a different colour.
- **Topic specific exam question practice:** use the resources on SharePoint to complete targeted question practice.
- **Exam practice:** use the AQA website or your textbook to complete past exam questions & self-assess.
